

Get set for storms.

Storms can strike hard and fast. Be prepared: check your home's roof and eaves are secure • make sure your gutters and down pipes are clear • trim tree branches so they are well clear of your home • clear your property of loose materials • prepare an emergency kit with torch, portable radio and first aid supplies • always follow instructions of officials and emergency personnel. To find out more about storm safety, contact your local council or visit www.disaster.qld.gov.au
